SOCIAL MEDIA MANAGER | STRATEGIC ASSIGNMENT FOR DELLA TOWNSHIPS

Future, *by Design.*

Social Media Strategy and Execution Portfolio for Della Townships and Della Resorts.

Bharat Bassi

Who I am and what I bring

Bharat Bassi

Social Media Manager

Six-plus years in social operations, ORM, analytics and customer engagement.

- Social operations: planning, publishing and daily community handling
- ORM and social listening: reading what customers say and closing the loop
- Analytics and reporting: one scorecard leadership can read in two minutes
- Customer engagement: fast, on-brand replies that move people to the next step

What I can produce for Della

- A monthly content calendar by pillar, channel and funnel stage
- Photo sets and Reels, Shorts and film edits, ready to publish
- One-page creative briefs for every shoot and campaign
- A weekly pulse and a monthly insights report with three actions

6+	years in social media and ORM	**22%**	engagement uplift	**3-4h to 30-40m**	reporting workflow

Toolset: Scheduling and publishing, analytics dashboards, social listening, photo and video editing

What I can own, end to end

01

Strategy

Channel roles, audience plans and quarterly priorities tied to enquiries and visits.

Output: Channel plan and funnel for each business

02

Planning

Content pillars, monthly calendars and campaign timelines with owners and deadlines.

Output: 30-day calendar and brief templates

03

Production

Shooting, editing and briefing creators so every post looks like one brand.

Output: Reels, Shorts, photo sets, carousels

04

Publishing

Scheduling, captions, tags, tracked links and approvals across four channels.

Output: On-time posts, one naming rule for links

05

Community management

Replies to comments and DMs, escalation rules and review responses.

Output: Response playbook and escalation matrix

06

Analytics and reporting

One scorecard per business, a weekly pulse and a monthly report with actions.

Output: Dashboard and monthly insights report

My creative capabilities

Photography

WHAT I PRODUCE

Township and resort photo sets: golden-hour lawns, amenity details, guest moments, site progress.

Builds trust and desire at the consideration stage.

Video editing

WHAT I PRODUCE

Reels, Shorts and walk-through cuts with captions, a strong first two seconds and a clear end card.

Earns attention and reach in target cities.

Content planning

WHAT I PRODUCE

A monthly calendar by pillar, channel and funnel stage, adjusted by what the data shows.

Keeps the feed consistent and every post purposeful.

Creative briefs

WHAT I PRODUCE

A one-page brief per shoot or campaign: objective, audience, shot list, message and call to action.

Aligns creators, sales and leadership before work starts.

Execution

WHAT I PRODUCE

A shoot-to-publish workflow with owners, approvals and deadlines, so delivery is steady.

Turns ideas into measurable results, week after week.

Every piece is planned against a business goal: awareness, consideration, qualified enquiries and reputation, not likes alone.

Understanding Della

Della Townships

13 townships being launched across 11 cities, with 9 more upcoming. Themes include Racecourse, International City, Lake Como, European Wellness and Wine City. An asset-light model: landowner partners bring land, Della brings design, marketing and operations.

Della Resorts and Adventure

Lonavala: 168 rooms and villas and an adventure park with 50+ activities on 36 acres. It shows, in the real world, that Della runs great places.

Positioning: Design-led, themed destinations from a group that already runs great places.

Audience groups

- Home and villa buyers
- Investors and NRIs
- Landowner partners
- Corporates and event planners
- Resort and adventure guests

Social observations to test in week one

- Township stories should feel as vivid as the resort stories
- Landowner partners need the asset-light model explained in plain words
- Every post needs a clear next step that can be tracked

Public information only. Follower and engagement data is not visible from outside, so week one starts with an audit.

Platform strategy: one job per channel

CHANNEL	BUSINESS OBJECTIVE	CONTENT FORMATS	RHYTHM
Instagram Discovery and desire	**Awareness and consideration**	Theme Reels, creator walk-throughs, Collab posts, Stories with enquiry links	4 to 5 posts and Reels a week, daily Stories
Facebook Local communities	**Qualified enquiries from city communities**	City communities, event pages, WhatsApp and Messenger enquiries, fast replies	4 posts a week
LinkedIn Investors and partners	**Partner enquiries and credibility**	Partnership explainers, leadership view, corporate and MICE stories	3 posts a week
YouTube Depth and trust	**Depth, trust and consideration**	Walk-through films, project explainers, Shorts cuts, search-friendly titles	1 film and 2 Shorts a week

ONE FUNNEL FOR EVERY CHANNEL

Attract | **Engage** | **Enquire** | **Visit** | **Decide**

Every post is planned for one stage and one measure: attract, engage, enquire, visit, decide.

Three campaign concepts

INSTAGRAM REEL

Live the Racecourse

Objective: Awareness to qualified site visits

“Imagine a weekend that starts on a polo lawn. Della Racecourse, Pune. Book a private site visit, link in bio.”

Measured by: 3-second hold, saves, enquiry clicks

FACEBOOK AND INSTAGRAM

Your city, your township

Objective: Qualified enquiries from each launch city

“Something new is coming to your city. See the theme, the design and the first look, then ask us anything.”

Measured by: Qualified enquiries per city, response time, questions answered

INSTAGRAM CAROUSEL AND FACEBOOK

Stay the Della way

Objective: Bookings, tickets and township visits, plus reputation

“One weekend, one place: 168 rooms and villas and 50+ adventure activities in Lonavala. Plan yours.”

Measured by: Link clicks, bookings from social, guest content, review sentiment

Proposed concepts with sample captions, for discussion. They are not live Della content.

Community and reputation management

Response workflow

Listen: monitor comments, DMs, tags, reviews and mentions daily

Triage: sort into question, lead, feedback or complaint

Reply: use the playbook, in Della's voice, the same day in working hours

Escalate: hand over with context when it needs sales or leadership

Learn: log the theme and feed it into content and service fixes

Level 1 **General questions and praise**

Reply from the playbook and keep the thread helpful

Level 2 **Price, availability, approvals, bookings**

Move to WhatsApp or a call, pass to sales with context within the working day

Level 3 **Complaints, safety, legal or media**

Escalate to leadership at once, reply once politely, take it offline

Social listening themes

- Price and payment
- Location and connectivity
- Delivery timelines
- Amenities and lifestyle
- Trust and approvals
- Stay and service experience

Reputation

- Reply to every review, good or bad
- Collect guest and owner stories with permission
- Track sentiment themes monthly and report them

Goal: protect trust. Questions get answers, leads reach sales with context, and complaints are closed fast and offline.

Analytics, KPIs and optimisation

Leadership dashboard *The metrics I would show leadership every month*

Reach in target cities
Are the right cities seeing Della?

Engagement rate
Is the content resonating?

Saves and shares
Is interest deepening?

Qualified enquiries
Is social creating demand?

Cost per qualified enquiry
Is effort and spend efficient?

Visits booked and completed
Is demand turning into visits?

North star: Townships, site visits completed | Landowner partners, qualified partner enquiries | Resorts and Adventure, bookings and tickets from social

MEASUREMENT FRAMEWORK

Visibility *Did we earn attention?*
Reach in target cities | Video hold and views, YouTube included | Follower growth

Consideration *Did interest deepen?*
Saves and shares | Engagement rate | Profile visits and link clicks

Demand and trust *Did it move people forward?*
Qualified enquiries | Visits booked and completed | Cost per qualified enquiry

OPTIMISATION LOOP

Measure → **Learn** → **Test** → **Scale**

Weekly pulse: Every Monday | Monthly insights: First week | Quarterly reset: Every quarter | Targets set from the performance audit

My first 30 days

WEEK 1

Audit performance

The channels are live, so I read how each performs: top content, audience, reach, enquiry sources and rivals.

WEEK 2

Set the system

Pillars, tone, brief template, approvals, tracked links and scorecard.

WEEK 3

Launch the rhythm

First shoots, first calendar, daily community handling.

WEEK 4

Report and refine

First monthly insights report with three actions and the next test.

Expected deliverables

- Platform performance audit
- 30-day content calendar
- Creative brief template
- Tracking and scorecard set-up
- Response playbook
- First monthly insights report

Days 31 to 90: launch the three campaigns, test hooks, formats and cities, then scale what works.

I bring ORM, social listening, analytics and day-to-day execution in one person, so Della Townships can grow reach and see what it earns.
